

MELISSA CAVAZOS

Program & Systems Analyst — Application Support | Data Operations | Case Management

Corpus Christi, TX 78413 | 361-558-6624 | melissacallis@yahoo.com | Portfolio: melissacallis-frontpage-d61dea39ef92.herokuapp.com

PROFESSIONAL SUMMARY

Analyst and administrator with 6+ years of experience spanning application & data systems support, cloud infrastructure, and program/case management operations. Graduate-trained in Data Science, combining hands-on technical skills — Python, SQL, AWS (EC2, S3, VPC, RDS, IAM), Docker, and GitHub — with a proven track record of managing caseloads, coordinating cross-functional stakeholders, tracking KPIs, and maintaining accurate documentation and data systems. Comfortable translating between technical and non-technical audiences, supporting both back-end systems operations and front-line service delivery, and improving workflow efficiency across administrative and technical environments.

TECHNICAL SKILLS

Languages & Data: Python, R, SQL

Cloud & Infrastructure: AWS (EC2, S3, VPC, RDS, IAM), Docker, GitHub, CI/CD Workflows

Platforms & Tools: Salesforce (Administration & Live Agent), Tableau, Microsoft Power BI, Microsoft Excel, Microsoft Office Suite

Systems & Process: Data Analysis & Organization, Workflow & Systems Documentation, KPI & Performance Tracking, Process Improvement

PROFESSIONAL STRENGTHS

Case Management, Client & Stakeholder Communication, Crisis Support, Analytical & Systems Thinking, Organization & Attention to Detail, Cross-Functional Collaboration, Process Improvement, Time Management, Adaptability, Data-Driven Decision Making

WORK EXPERIENCE

MHID — Caseworker

September 2025 – Present

Case Management & Workflow Coordination

- Track KPIs and operational data to monitor caseload, client services, follow-up activities, and overall program performance.
- Apply structured data-management practices to organize client and program information, improve information accessibility, and support timely decision-making.
- Analyze workflow demands and competing priorities to improve task sequencing, resource utilization, and operational efficiency while maintaining client-centered service delivery.
- Maintain accurate, timely documentation of client activities, service needs, appointments, and program-related progress.
- Conduct intake and enrollment for a respite-care hospital step-down program, gathering client information and assessing needs to support appropriate placement and continuity of care.

- Review and approve referrals from hospitals by evaluating client needs, program eligibility, service requirements, and appropriateness for the respite-care step-down setting.
- Provide psychosocial rehabilitation services to individuals experiencing crisis, utilizing Illness Management and Recovery (IMR) principles to support recovery, stability, self-management, and community functioning.
- Monitor and coordinate client needs, appointments, services, and follow-up activities to promote continuity and timely service delivery within established case management workflows.
- Collaborate with healthcare providers, program staff, and other stakeholders to facilitate appropriate referrals, communication, service coordination, and transitions of care.

LiveOps [Contract] — Program Strategist / Teleservice Analytics
Consultant

March 2016 – March 2024

- Processed and stored data using Python and AWS services (EC2, S3, VPC, RDS, IAM), along with third-party tools such as Docker and GitHub.
- Extracted, cleaned, and prepared data for analysis, utilizing Excel and SQL.
- Utilized Salesforce dashboards and Tableau to present and visualize results for program development.
- Compiled and recorded patient call data in Salesforce to analyze ways to build patient rapport and increase engagement percentages.
- Reviewed performance indicators and KPIs to support organizational objectives and consistent achievement of performance standards.
- Assessed individual client needs, preferences, and service requirements to support personalized service planning within program workflow standards.
- Measured engagement and compliance with program guidelines; supported service workflow and data operations.

LiveOps [Contract] — Social Media Strategist

March 2020 – March 2021

- Managed Salesforce Live Agent to chat with patients via Facebook Messenger's platform, supporting the launch of a pharmaceutical brand's patient chat channel.
- Compiled and charted data, reporting directly to stakeholders, researchers, developing engineers, and safety officers to support successful implementation of CI/CD project workflows.
- Closely followed agile practices, collaborating with cross-functional marketing, content, and design teams to align social media strategy with overall messaging and branding initiatives.

EDUCATION

Eastern University — Master of Science in Data Science, October 2024

Texas A&M University–Corpus Christi — Bachelor of Arts in Psychology, 1998–2001
